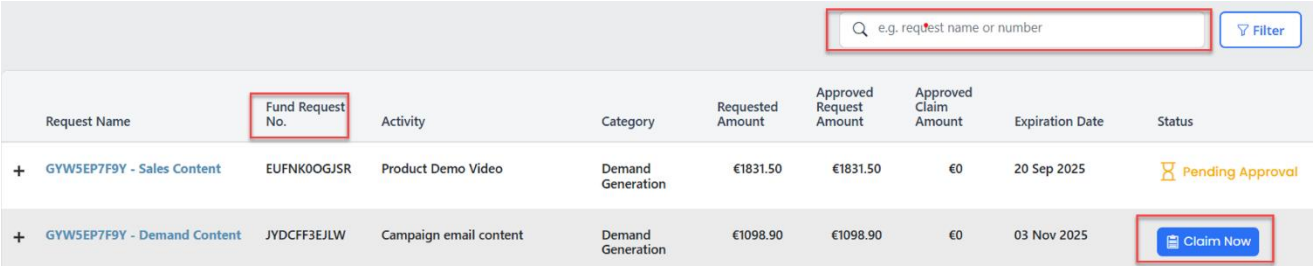
To help ensure that your claim is quickly processed, this document outlines the important details that must be included in your claim. All claims require the following documentation:

- Fund Request Number (Claim ID)
- Partner Invoice
- All Third-Party invoices
- Proof-of-Performance Items

Development Fund Request Number (Claim ID)

Once your proposal is approved, the "Claim Now" button will be enabled. You may then submit your claim along with the required documents once the activity has been completed or delivered.

For ongoing subscriptions (e.g., LH, Social Sales Tool, and TDD) or campaigns with post-follow-up actions, you may also submit your claim as long as the required metrics are provided. If you are searching for a specific claim, you can locate it using the Fund Request No. (Claim ID) in the upper-right corner (see screenshot).



Claim Requested Amount

The funds requested amount in EUR is the same as the funds approved amount in your proposal. However, depending on the currency used to pay the third-party vendor, you may need to adjust the claim requested amount in the local currency.

The claim requested amount can be equal to or lower than the fund requested amount, based on the third-party tax invoice and the applicable currency exchange rate on the claim submission date.

Partner Invoice

As the partner, you will need to create an invoice **after you have delivered an eligible activity**. Please ensure your invoice includes the following details:

- Fund Request Number (Claim ID) (from your approved request in the new Development Fund platform) as mentioned above
- The invoice must be issued on your company letterhead
- Reimbursement net amount from SAP (without VAT).
- this net amount must match the claim requested amount you entered in the platform
- The net amount on your invoice must also match the net amount of the related, third-party invoices you have paid for
- If your third-party invoice is in a different currency than the local currency of the country where you are submitting the claim, please convert the amount using the exchange rate on the claim submission date.
    - The currency conversion should be based on ECB Currency Converter
    - If the official ECB reference rate is unavailable, please use Reuters
    - If the currency is not up to date in those two sources, please use XE and then OANDA.

THE BEST RUN SAP

- Ensure all details, such as SAP entity address and VAT, are correct. Please refer to the List of SAP Entity Addresses for specific details.

- Partners in the SAP PartnerEdge Build track should address their invoices to:
  SAP Ireland Limited, Waterside 3, Citywest Business Campus, Dublin 24, D24 WA02, Ireland.

Third-Party Invoice

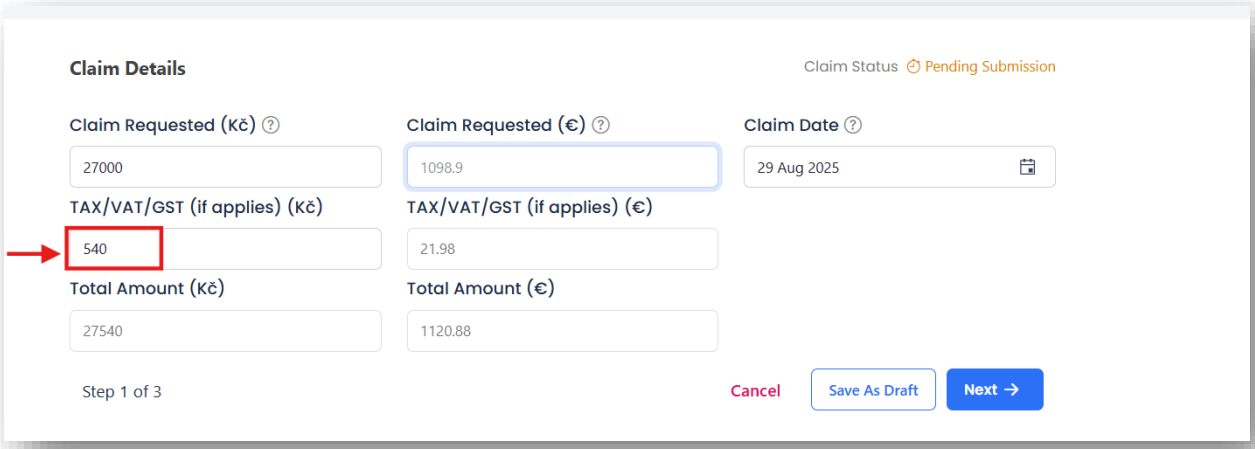
As mentioned above, the Net amount in the partner invoice should match the net amount of all the related third-party invoices.

Please ensure third-party invoices are addressed to the entity that SAP has approved funds to be utilized by.

Note that SAP invoices to partners, for SAP-led activities, are considered as third-party invoices.

VAT Section:

- Always complete the VAT section when submitting a claim.
- The VAT details must match the VAT shown on your partner invoice
- The local currency will automatically be converted into euros in the system
- Note: previously, VAT was added by the AP Finance team. Now it is mandatory for partners to enter VAT details directly



Invoice Number

- Always enter your partner invoice number in this field – not the vendor's (third-party) invoice number
- Make sure the invoice date matches the date the invoice was issued (should be the claim submission date)
- Incorrect or missing invoice information may delay claim processing

Proof of Performance

Acceptable proof-of-performance items can be found in the Development Fund How to and Best Practice guide. This guide is what SAP's Partner Investment Concierge team uses to review and approve claims.

We strongly encourage you to familiarize yourself with the guide to ensure you are collecting the right documentation for your claim, resulting in a quicker reimbursement.

Other Considerations

- **Activity Start and End Date:** When creating a request, ensure that the start and end dates reflect the full duration of the activity. For single-day physical or digital events, use the exact event date.

– For Learning Hub yearly subscriptions and TDD quarterly subscriptions, we advise creating the proposal before acquiring the subscriptions, and creating a proposal with a time frame or activity duration of at least 1 day for faster reimbursement

- **Start date** in the request is a very important part of reimbursement, since all activities must be delivered after having SAP approval. Third party invoice issue date should be after the approval date, or in case of an earlier agreement, should mention the delivery date for the activity. Failing to follow these rules will impact claim reimbursement.
- **Third-Party Agency Activities:** Source of activity should be selected carefully if it's going to be executed by third-party agency, Agency chosen by SAP or SAP-led, because it can't be changed later and would need to be cancelled if created incorrectly.
- **Direct Pay**: Please make sure the activity you book through PBC is offered from SAP through Direct pay, by filtering with this option in left toolbar. These are services offered from SAP and amount is deducted automatically without the need of standard invoice. In case partner creates Direct pay category proposal and it is Agency chosen by SAP category (PBC), partner will need to create ticket to IT.

Claims Verification Audit

SAP reviews claim throughout the year to ensure thorough compliance with the Development Fund rules and guidelines. Please retain all your supporting documents and financial records on file, for ten years, starting on January 1 of the year following the year in which the data were transmitted or transferred, or for the minimum period required by applicable law, whichever is longer.

All claims are subject to verification by SAP. If SAP or an independent auditor elect to review these records on your premises, you are required to provide access. We recommend maintaining separate files for each claim so that information will be easy to provide upon request.

SAP may conduct any claims verification audit in accordance with this guide in addition to carrying out any other audits under your partner agreement with SAP. Claims verification audits do not count towards SAP's annual compliance audit. Such claims verification audits shall not be considered annual audits by SAP, as envisaged by such agreement.
